CAREER OBJECTIVE

Computer Science undergraduate with strong interest in AI-driven applications and full-stack development. Seeking an opportunity to apply my skills in Python, Generative AI, and modern web technologies to build practical and scalable software solutions while continuously learning and contributing to impactful projects.

EDUCATION

Chandigarh University, Mohali 2022 – 2026
B.E. Computer Science (Big Data Analytics) — CGPA: 7.46
DAV Public School, Dhanbad
12th: 80.83% | 10th: 84.67%

TECHNICAL SKILLS

Languages C++, Python, SQL
Core CS OOP, DBMS, OS, Data Structures & Algorithms
AI / GenAI LangChain, Ollama, FAISS, RAG Pipelines, NLP, Prompt Engineering
Tools Git, GitHub, Vercel, Docker

EXPERIENCE

Freelance Software Developer 2023 – 2024

- Led multiple end-to-end projects as technical lead — understanding requirements, building solutions in Python, and delivering working software on time.
- Built AI-assisted tools in Python using RAG pipelines and LLM inference for natural language querying over structured and unstructured datasets.
- Worked with CSV and PDF datasets to build simple data processing scripts and dashboards based on client needs.

PROJECTS

AI Document Intelligence System GitHub
Python · LangChain · FAISS · Ollama · Streamlit

- Developed a document query system enabling users to explore complex PDF files through natural language interaction using a locally running LLaMA model.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline with vector-based similarity search to retrieve relevant document sections before generating responses.
- Built and deployed an interactive Streamlit application for conversational document exploration over unstructured data.

CUReSell — University Resale Marketplace GitHub Live
Next.js 14 · Supabase · PostgreSQL

- Developed a full-stack marketplace platform for university students to buy and sell used items within campus using Next.js, Supabase, and PostgreSQL.
- Implemented user authentication, product listings, role-based access, and protected routes with a responsive UI, and deployed the application online for real-world usage.

MoonzNails — Full-Stack E-Commerce Platform GitHub Live
React 18 · Firebase · Firestore

- Developed a full-stack e-commerce web application using React, Firebase, and Tailwind CSS with product catalog, shopping cart, coupon system, and order management features.
- Implemented Firebase Authentication and an admin dashboard for managing products and orders, with responsive UI and real-time data storage using Firestore.
